

C

BLOCKED

Leave-one-city-out transferability test

Missing inputs:

- Figure 5's optimization output (integrated-strategy performance per city) -- never executed, see figure5 notebook
 - v2 thermal pipeline (canopy fusion + building shadow + four-state decomposition) complete for enough cities to support cross-city statistics -- only Palma fully validated at notebook build time; Bilbao/Sevilla Phase 2 in progress
 - requires the LOCO procedure itself to be designed and implemented -- not yet done
